

## TA Targets Extended Breakdown Base Instructions

The Breakdown Base Extension is offered on its own (P/N: BDB-30EXT-R9) and customers can also purchase the Breakdown base WITH The Extension included (P/N: BDB-30-R1). The assembly process is identical regardless of HOW the extension is purchased.

### **A few important safety notes:**

- ALWAYS follow our safe shooting guidelines
- ALWAYS be sure to operate on a safe and approved range.
- ALWAYS be sure you are using your targets and firearms properly.
- ALWAYS wear required personal protective equipment (eye protection, ear protection, proper clothing, etc.)
- ALWAYS be sure that your targets are stable and set up in the proper manner.
- ALWAYS BE CERTAIN WHAT IS BEYOND YOUR TARGET. Missed rounds that are not FULLY captured by a backstop can cause serious property and personal injury including death. It is YOUR responsibility to ensure safe shooting conditions.
- Under NO circumstances should you misuse your steel targets or shoot on a range lacking proper backstops.
- Prior to using this product, you MUST read our safe shooting guidelines. YOU are responsible to ensure you use this product properly and in a safe manner.
- Always assume metal and wood target components are sharp. Handle with working or leather gloves only
- Always assume lead is present. Wear protective gear and ALWAYS wash hands after handling any target component.

The Base Extension (BDB-30EXT-R9) ships with the following components :

- (one) laser cut & Bent Breakdown Base Extension (P/N: BDB-30EXT-R9)
- (TWO) 3/8" X 1" Carriage Bolts
- (TWO) 3/8" Flat Washers
- (TWO) 3/8" Wing Nuts
- **(When purchasing as a complete base WITH extension, it will also include the breakdown base and paper holders)**

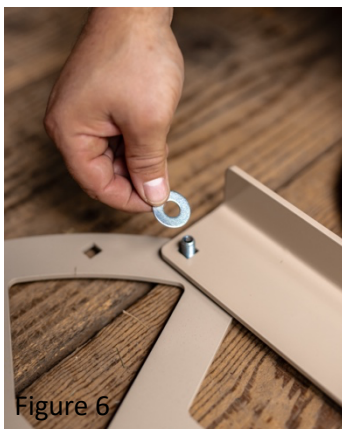

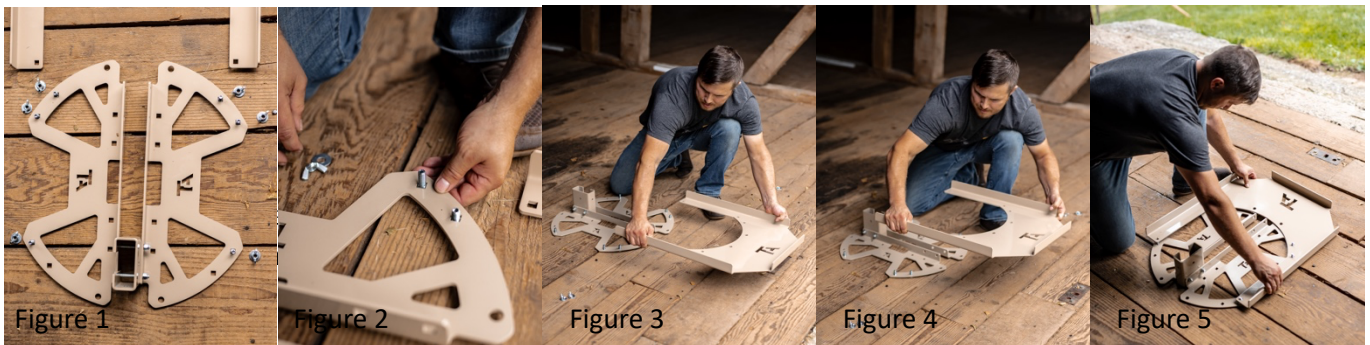

\*It is important to note that you will need SIX carriage bolts in total, SIX wing nuts, and SIX washers to install the Breakdown Base Extension to your Current Breakdown Base.

**\*\*You will use the FOUR bolts, washers, and wing nuts that are included with your Breakdown Base (whether you order it complete, separate, or for an existing breakdown base you already have)**

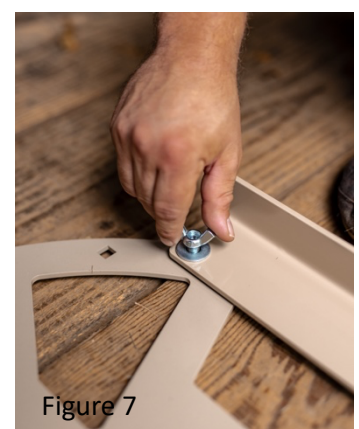

**\*\*\*If your current Breakdown base is missing hardware, you will need to order more from us. Please contact us. You MUST install all six bolts when using the Breakdown Base Extension.**

Installing Breakdown Base Extension:

- 1.) Assemble your breakdown base by following our breakdown base instructions. LEAVE YOUR PAPER HOLDERS OFF FOR NOW. You will need them off to install your extension. You can find these instructions HERE:  
<https://tatargets.wpenginepowered.com/wp-content/uploads/2023/04/TA-TARGETS-SINGLE-BREAKDOWN-BASE-MANUAL.pdf>
- 2.) Line the Extension up with the six required holes on the breakdown base. It should look as follows:

- Insert all six Carriage bolts through the holes shown in figure 1.
- Align the Extension over the six holes with the extension facing the FRONT of the breakdown base (as shown in figures 2-4)
- Install the washers and wing nuts on the rear most bolts first. Install washer, then wing nut. Tighten hand tight until snug.
- If no paper holders are to be used, install nut and washer to remaining bolts around base.

- 3.) If you desire to install paper holders, simply place the paper holders over the front four bolts as shown here:

A note about the paper holders:

- Standard Paper holders for USPSA targets will mount on top of the extension as shown
- Extended paper holders will ALSO work with the extension but MUST be mounted BELOW the breakdown base/extension to clear the bent sides of the extension.

At this point your breakdown base with extension is assembled. Follow all other product instructions for our complete systems to learn how to install your wood or armored post.

Care and Maintenance:

The Breakdown base and extension require little care and maintenance. If desired, touch up with our paint that is available separately on our site.

Use of Extended Base:

The extension should face forward when used for maximum stability. The Extension is REQUIRED when using our Rifle Dueling Tree, Goliath, and Phoenix systems. It is OPTIONAL for our other systems. If more stability is required, we HIGHLY suggest purchasing our target stakes. Stakes are available on our website. See our individual product instructions for more information.

**Note: The Breakdown Base, Extension and its components are NOT targets. They also are not to be used with steel target systems. Do NOT shoot bullets at your Breakdown Base under any circumstances. Damage WILL occur and this can be dangerous.**

If you have any other questions, please feel free to email our team and we'll be able to further assist you with setting up your new target system.
